DETAILED ACTION

This is in response to a letter for patent filed on March 21st, 2001 in which claims 1-53 are presented for examination. Claims 1-53 are pending in the letter.

RESTRICTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-23, 33-52, drawn to managing valuable document, classified in class 705, subclass 64.
 - II. Claims 24-32, drawn to data structure for storing two dimensional coordinate, classified in class 382, subclass 181.
 - III. Claims 53, drawn to printing authenticated currency, classified in class 382, subclass 154.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because they are patentably distinct. The subcombination has separate utility such as

managing valuable document, data structure for storing two dimensional coordinate and printing authenticated currency.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group II and III, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
